

# **“Sustainable upland production landscape: reflections for advancing agri-environmental policy in Indonesia National-Conference**

SDGs Center - Universitas Padjadjaran

**[www.sdgcenter.unpad.ac.id](http://www.sdgcenter.unpad.ac.id)**

Bale Rumawat Kampus UNPAD, 26 Januari 2023

# SDGs CENTER UNPAD

Center for  
Sustainable  
Development  
Goals Studies

Universitas  
Padjadjaran

Center for Sustainable Development Goals Studies (SDGs Center) of Universitas Padjadjaran is a **venue for multi-disciplinary research related to SDGs** at the global, national and local scale.

It serves to facilitate **sharing of SDGs-related research findings** from both the university and its partners. It also facilitates **capacity building** to enhance the analytical capacity of academic community and policy makers from national and local level to conduct SDGs related analysis.

# VISION & MISSION

- **Our Vision**
  - Indonesia achieving SDGs in 2030
- **Our Mission**
  - Providing evidence-based policy recommendations to achieve SDGs
  - Independently monitoring progress of SDGs
  - Mainstreaming SDGs into research and policies
  - Facilitating dialogues to achieve SDGs

# OUR MAIN ACTIVITIES

## SDGs Center Engagement:

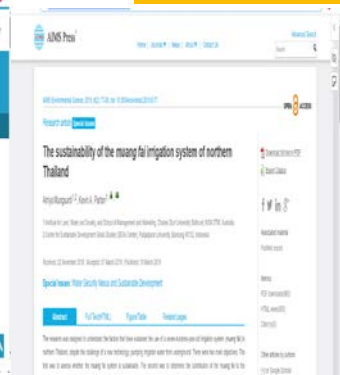

Curriculum SDGs  
for TPB

SDGs Baseline Studies  
National and SDGs Local  
Action Plan  
VNR, VLR, Road map SDGs  
Interlinkages Analysis

# Sustainable upland production landscape

- Sustainable agriculture plays a central role in achieving SDG 6 on water, SDG 12 on sustainable consumption and production, SDG 13 on climate change adaptation and mitigation, and SDG 15 on land use and ecosystems, SDG 1 on zero poverty, SDG 2 on no hunger, and SDG 8 on growth and decent job.
- There is a growing thought on the ‘production landscape approach’ for sustainable agriculture
- Production landscape is a landscape system focusing on food growing for both own consumption and income generation purposes. In many developing countries where a production landscape is a continuous part of the landscape systems, transitioning from forest to non-forested lands, the production landscape is multifunctional and provides different goods and services to various stakeholders.
- When managed sustainably, the production landscape has benefits on and beyond the farm.

# The Conference

- This seminar presents the findings of IndoGreen collaborative research resulting in the alternative policy pathways to improve agriculture's environmental and long-term performance in upland catchments.
- The seminar is expected to summarise the main policy leverages to achieve sustainable and secure food systems aligned with these goals.

Enjoy the seminar and  
have a fruitful discussion
